A which threshold moves sets the sign
competitor's episode
unmanipulated
anti-gated -23%
continuous -16%
gated +7%
asymptote
adaptation imbalance u (units of L)
time since handover (units of 1/γ)
B the ratio follows φ
Spearman +0.81, n = 200
gated coupling ratio
φ = (L − c)/(L + c), unmanipulated trace
C and predicts who leaves
proportion leaving rivalry
n=180
n=94
n=52
n=26
n=26
n=22
<.25
.25–.5
.5–.75
.75–1
1–1.5
≥1.5
threshold shift δ / gap (L − c)
